Vasisth Pandya

SOFTWARE ENGINEER

SUMMARY

I am a passionate software developer with over 2 years of industry experience specializing in building mobile and web applications. In my role, I focus on writing and styling front-end components to meet mockup requirements and fulfill user stories. Additionally, I excel in integrating APIs and implementing business logic using JavaScript and TypeScript.

EXPERIENCE

Software Engineer
Sadhrasya SoftTech   Apr 2022 - Present

- Proficient in developing mobile applications using Ionic and Angular framework, specializing in UI development and API integration.
- Skilled in setting up Angular projects and implementing Continuous Integration/Continuous Deployment (CI/CD) pipelines to automate environment and code deployment processes.
- Demonstrated expertise in project management and development for a comprehensive platform resembling Zomato, encompassing multiple web portals and a mobile application.
- Spearheaded the creation of the onboarding portal and contributed to the enhancement of various features across different portals, including menu management, real-time chat functionality using PubNub, and seamless payment integration utilizing Stripe Payment.
- Contributed to the development efforts for a business portal managing data from IoT devices, with a focus on dashboard creation and authentication operations using Angular.
- Instrumental in building an online delivery platform, specializing in route integration utilizing HERE Map services and implementing additional driver-centric features based on HERE Map services.

Frontend Developer
Jetbro   Mar 2022 – Apr 2022

- Developed responsive web pages utilizing advanced CSS techniques, including grid systems like CSS Grid, to ensure optimal layout and presentation.
- Translated designs from Figma and Photoshop into functional web pages, maintaining fidelity to the original designs while ensuring responsiveness across various devices.
- Proficient in utilizing React framework to enhance interactivity and user experience on web applications.
- Familiar with utilizing JIRA project management tool to effectively plan, track, and manage project tasks and workflows.

3d Visulizer/Designer
Packman Bespoke Gifting   Aug 2020 - Sep 2021

- Created bespoke 3D designs tailored to client specifications, ensuring alignment with their vision and requirements.
- Took charge of an Android Game project, overseeing its development from inception to successful delivery. Employed a range of tools including Photoshop, 3ds Max, Substance Painter, and Unity3D to bring the project to fruition.
- Engaged as a freelance developer with other company, while also undertaking architectural rendering projects independently. Collaborated with my design team from MAAC under the guidance of our mentor.
